### **Important: Known Firefox Security Concern**

UITS recommends that Mac users utilize the Safari Browser. When viewing a pay advice, Firefox downloads a copy of the pay advice to the computer an employee uses to view the Pay Advice. This recommendation is especially important in relation to shared Mac computers (i.e., computer labs).

### **UMass Productivity Kit (UPK) Requirements**

The UPK provides users with training support materials:

- UPK is supported in Safari 4.0+
- UPK “Do it” mode is supported in Firefox 3.5+

### **Enterprise Application Software Requirements**

Supporting Software	Version
MS Office for windows	2003+
MS Office for Mac	2004+
PDF Documents	Adobe Reader 6+

- Resolution: Minimum resolution of 800 x 600

### **Pop-Up Blocker**

As the University moves to version 9.0, UPK, and web functions within and associated with the HCM Application will be impacted by the browsers pop-up blocker. It is suggested that the local desktop environment be configured to allow for pop-ups in these cases.
