# Admissions

## *Definitions*

**Admission...** is the application and decision process for entrance as a degree-seeking student.

**Applicant...** is a person who completed an application for admission as a degree-seeking student. A completed application is one that includes all the materials required for an admission decision. Only Day (state-supported) students at UML enter through the admission process. Continuing Education students enter degree programs through a different process.

**Accepted student...** is an applicant who was accepted (admitted) to degree-seeking status. Acceptance rate is percentage of applicants who were accepted.

### **Enrolled/New student**

The accepted applicant enrolled and was registered as of the semester's census date. Enrolled rate (or "yield") is percentage of accepted applicants who registered. Nondegree students, even if new, are not "accepted" and so are not reported under Admissions. "Readmit," which is not considered an admission category in external reports, is not included in OIR data.

**First-time freshman...** is, by federal definition, an entering first-year degree-seeking student with no previous college attendance.

**Transfer...** is, by federal definition, an entering undergraduate degree-seeking student, at any class level, who is known to have attended another postsecondary institution. If a student from UML Continuing Education (a separate "institution") transfers into a Day degree program, the student appears in Day transfer admissions for that semester.

### **BHE categories**

The Massachusetts Board of Higher Education introduced new admission requirements for undergraduates entering in fall 1997, and the terms "freshman" and "transfer" were given BHE-specific definitions. The BHE continues to require that freshmen and transfers be assigned to one of four BHE classifications--regular, nontraditional, exception, and special--and percentage limits are placed on special admits.

**SAT scores...** are the highest math and highest verbal scores submitted by a freshman applicant. Since fall 1998 UMass campuses have reported scores for all first-time freshmen with scores. In 1995-96 the College Board recentered the SAT scale, so scores reported before fall 1996 are not comparable.

**High-school weighted GPA...** is, since fall 1997, a freshman admission criterion mandated by the Board of Higher Education. GPA and SAT scores must meet a sliding scale for "regular" admission. Grade-point-average is calculated for designated college-preparatory courses and is weighted for honors courses. UMass campuses report weighted GPA for all first-time freshmen for whom it is available.

**Graduate admission...** is the application and decision process for entrance to master's, CAGS, and doctoral programs. Because graduate entrance exams and other admission criteria differ widely among programs, Factbook 2004-05 does not include an academic profile of incoming graduate students.

**Census date:** OIR compiles fall and spring admission data from student-record files "frozen" shortly after the add/drop periods. In 2007-08 the freeze dates were September 25, 2007, and February 19, 2008. The summer freeze date for graduate admission is end-of-term. Reporting requirements dictate the timing.

\*Masters and Doctoral students have been totaled together

# Enrollment

## *Definitions*

### ***Day / Continuing Education***

"Day" students are: state-supported; registered in the Colleges of Arts and Sciences-Fine Arts/Humanities/Social Sciences, Arts and Sciences-Math/Sciences, Education, Engineering, Health Professions, and Management; enrolled in credit-bearing courses or graduate Continued Matriculation; degree-seeking or nondegree. (A nondegree student may be working toward a certificate.)

"Continuing Education" students are: not state-supported; registered in the Division of Continuing Studies and Corporate Education; enrolled in credit-bearing courses; degree-seeking or nondegree. (A nondegree student may be working toward a certificate.) OIR does not report non-credit Continuing Education enrollments.

### ***Headcount***

... is the number of students registered for the semester as of the census date. Some Day undergraduates also appear in Continuing Education headcounts, but their CE credits are reported in Continuing Education only. Unless "FTE" is specified, all enrollment figures are headcounts. A total headcount that combines Day and Continuing Education students is always ***unduplicated***; that is, students enrolled in both Day and CE courses are counted only once.

***Undergraduate / Graduate*** ... always refers to the student's class level, unless course level is specified.

### ***Undergraduate student level (class level)***

OIR uses the definitions of first-year, second-year, etc. prescribed for federal enrollment reporting. Freshman: matriculated undergraduate with 0-29 accumulated credits (including first-time freshman); Sophomore: 30-59 accumulated credits; Junior: 60-89 accumulated credits; Senior: 90 or more accumulated credits. Nondegree students do not have a class level and are reported as a separate category.

The undergraduate class levels that appear in UML's student records are based on a different calculation to accommodate the Financial Aid definition of freshman as 0-23 credits.

### ***Full-time or part-time status***

... is, by federal definition, based on the number of credit hours in which the student is enrolled for the semester. A full-time undergraduate is enrolled in 12 or more credits, and a full-time graduate student is enrolled in 9 or more credits. (Note that in Massachusetts the *full-time-equivalent* undergraduate is calculated from 15 credits. See next page.)

### ***Race/ethnicity***

... follows federal classifications, with the addition of Cape Verdean, a Massachusetts category that is combined with Black in national reports. Only U.S. citizens and permanent residents are reported by race/ethnicity. International students on visas are classified separately as Nonresident Aliens. Student reporting of race/ethnicity is voluntary, so "unknown" is an additional category. ***Minority*** total combines the categories currently called American Indian/Alaskan Native, Asian/Pacific Islander, Black Non-Hispanic, Cape Verdean, and Hispanic; minority percentage for UMass reports is based on all U.S. students of known race/ethnicity.

### ***Residence***

... for Day students can be defined in a number of ways depending on the purpose of the report: initial address, permanent address, local address, billing address, tuition classification, etc. Rarely are all these addresses identical, so enrollment counts by residency differ. Most Continuing Education students have a billing address only; their tuition does not vary by residency. (Notes with the data tables provide additional explanations.)

***Summer I and Summer II*** ... are the two sessions that UML Continuing Education runs from June to August. OIR adds both terms to annual counts for the following academic year.

**Summer Day term** ... was established in 1996 for state-supported graduate students on a trimester schedule in the College of Education. Figures for all summer Day students in all colleges now appear under "Summer" at the beginning of each academic year.

**Major / Program**

The terms "major" and "program" are often used interchangeably, but a major can be "undeclared" and a degree program cannot. External reports do not break out **program options or concentrations** because majors are classified by federal CIP codes, which do not differentiate options. However, in the Factbook OIR shows the Business Administration concentrations individually because of their large enrollments.

**Credit hours and FTE**

**Student credit hours enrolled...** are those that appear in a student's registration record for the semester. OIR reports credit hours from student records unless course credit hours are explicitly cited.

**Course credit hours enrolled...** are those that appear in a course record for the semester. Total student credit hours and total course credit hours should be identical. **Course department** is a designation in course records but is not necessarily the same as the academic department of the course instructor.

**Student FTE (full-time-equivalency)...** is calculated from student credit hours: 15 undergraduate credit hours = 1 FTE, and 9 graduate credit hours = 1 FTE. All credits of undergraduates count as undergraduate credits, even if the students are enrolled in graduate courses: the **student's level** (undergraduate or graduate) determines the FTE level. OIR reports FTE enrollment from student records unless course FTE is explicitly cited.

**Course FTE...** is calculated from course credit hours: 15 undergraduate credit hours = 1 FTE, and 9 graduate credit hours = 1 FTE. Credits of undergraduates in graduate courses count as graduate credits: the **course's level** (undergraduate or graduate) determines the FTE level. Course FTE is identical to student FTE only where all courses **and** students are undergraduate or where all are graduate. Because there are more UML undergraduates in graduate-level courses than graduate students in undergraduate courses, course FTE produces the higher total FTE. For example:

<b>Credit hours of</b>				<b>Student FTE</b>	
Undergrad students	4,000	/15	=	Undergrad	267
Grad students	2,000	/9	=	Grad	222
Total	6,000			Total	489
 <b>Credit hours in</b>				 <b>Course FTE</b>	
Undergrad courses	3,000	/15	=	Undergrad	200
Grad courses	3,000	/9	=	Grad	333
Total	6,000			Total	533

**Continued Matriculation**

... is the status of a graduate student not currently in a credit course but enrolled in a required non-credit course in order to maintain degree candidacy. Because other UMass campuses award three credits for comparable status, OIR modifies UML's graduate FTE figures for UMass system-wide reports; that is, three credits are added to **student** credit hours for each student with Continued Matriculation status. (Course credit hours are not adjusted.) All OIR reports are based solely on credits in UML student records unless **FTE for UMass** is explicitly cited.

**Census date...** OIR compiles fall and spring enrollment data from student-record files "frozen" shortly after the end of the fall and spring add/drop periods. In 2007-08 the enrollment freeze dates were September 25, 2007, and February 19, 2008. Summer and winter freeze dates are end-of-term. Reporting requirements dictate the timing.

<b>Total headcount</b>			8,731	8,488	8,099	9,081	303	9,404	8,970

\* First major only; total majors equal total headcount.

\*\* (d) indicates program discontinued or merged with another before Fall 2002.

\*\*\* Graduate nondegree students, including those in certificate programs, are typically registered as declared majors.

♦ Breakout of concentrations is shown because virtually all Business Administration majors have a concentration after first year.

♦♦ UMass multi-campus programs, new in 2002-03.

**Note:** OIR no longer reports **Continuing Education headcount by major** because the census counts are misleading. The majors of many CE students are not updated before the freeze date.

# Retention

## Definitions

### ***Retention reporting (longitudinal tracking) compared with census reporting***

Unlike the single "snapshot" used for each census report, longitudinal tracking is a series of snapshots of a specified group (the *cohort*) over time. Currently, OIR tracks a cohort from fall to fall rather than semester to semester.

***Cohort*** ... is not a company of Roman soldiers but a group of students, with at least one common characteristic, whose enrollment status is tracked from one point in time to another. In OIR's reports a cohort is an entering fall-semester group designated for retention and graduation studies.

OIR currently tracks the following cohorts (and has begun to expand the characteristics that are tracked):

- full-time first-time freshmen, into the seventh fall semester since their entry (for federal reports);
- full-time first-time freshmen receiving athletic aid, into the seventh fall semester (for NCAA);
- full-time undergraduate transfers, into the second fall semester since their entry.
- undergraduate transfers entering as juniors or seniors, into the fourth fall semester since their entry.

OIR has also begun compiling retention data for departments undergoing program accreditation and state-mandated assessments, although the Factbook does not encompass that level of detail.

***Retention rate*** ... is the percentage of the cohort that returned (or was "retained") the following fall and was enrolled at the census date. The reasons for withdrawal can be academic or personal, and the student may eventually return after stopping out or transferring out. A returning student remains in the original cohort throughout the tracking period.

***Graduation rate*** ... is the percentage of the cohort that received the undergraduate degree between September 1 and August 31 of the tracking year. To track cohort members who would otherwise be lost between June degrees and the fall enrollment census, graduation includes summer degrees that are dated October. OIR hopes eventually to gather graduation rates or time-to-degree for master's and doctoral students, but there are no standardized definitions for graduate-student tracking.

***Persistence rate*** ... is the percentage of the cohort that graduated within six years or persisted into the seventh year. Currently OIR tracks students only through their seventh fall semester, the last tracking period for external reports.

### ***Student Right-to-Know***

Since 1997-98 institutions have been required to report annually to the U.S. Dept. of Education the graduation rates of full-time first-time freshmen. In compliance with the Student Right-to-Know (SRK) Act, colleges are also required to include their rates in all publications directed at prospective students. The first SRK cohort entered in Fall 1991, and the key SRK statistic is the six-year graduation rate.

Federal and NCAA reports require tracking by race/ethnicity and gender.

### ***Freshman athletes***

Since 1997-98 all institutions that grant athletically related financial aid have been required to include retention and graduation data on scholarship athletes in the federal report on graduation rates for all full-time freshmen. The report tracks only freshmen receiving athletic aid, not all freshmen in intercollegiate sports. The report's section on athletes also meets an NCAA requirement for Division I and II campuses.

***Census date*** ... OIR compiles graduation rates from degrees granted from fall through summer (dated November through October) and retention/persistence data from the fall enrollment census (September 25, 2007). Reporting requirements dictate the timing.

\* The first cohort to be tracked.

\*\* Some degrees granted in the fourth or fifth year are not recorded in time for the annual retention census but are picked up in the sixth-year census, the critical year for reporting graduation rates.

\*\*\* Including degrees that do NOT appear in retention reports because they were granted after the sixth-year census.

\* Graduation rates are omitted when there are fewer than five in the entering cohort.

\*\* This rate is correct, although it differs greatly from earlier years. The unusual attrition of this cohort began in its first year.

# Degrees

## Definitions

### ***Degrees granted (conferred, awarded)***

Reports to the U.S. Dept. of Education group degrees by *level* (doctoral, master's, bachelor's, associate). The Certificate of Advanced Graduate Study (*CAGS*), a post-master's award in Education, is reported separately, but in UML and UMass system-wide reports the CAGS figures are added to master's. OIR's reports for UML break out degrees further by *title* (PhD, MBA, BS, etc.).

### ***Degree year***

July 1-June 30 is the period for federal reporting of degrees granted. It includes UML degrees dated from October through June. Awards after the degree census date, even if retroactive to the July 1-June 30 period, do not appear in OIR's degree counts.

### ***Degree program / degree major***

Factbook tables show degree programs by name, without breakout by program option. External reports do not show options because a major is reported not by name but by a federally designated CIP code, which is the same for all options within a program. OIR does collect data on options, available on request.

### ***CIP Codes***

The U.S. Dept. of Education requires that degree programs be reported by codes listed in its CIP (Classification of Instructional Programs) directory. These codes--from a two-digit broadly defined group to a six-digit program within the group--permit the aggregation of degree data at the national level and facilitate program comparisons among institutions.

### ***First major / Double major***

External reports currently include only the first major of a degree granted with a double major. A small number of UML degrees are granted with double majors, the Factbook reports these second majors. Two options within the same major do not constitute a double major. Minors within degrees granted are not currently reported.

### ***Day and Continuing Education degrees***

External reports do not differentiate between Day and Continuing Education, but OIR identifies CE degrees in Factbook tables for the UML community.

### ***Certificates awarded***

A certificate in a particular area of expertise may be awarded at either the pre-baccalaureate or graduate level upon completion of a sequence of courses totaling twelve credits or more. Certificates requiring fewer than thirty credits are currently included in UML's degree reports not by certificate name but only as a total annual count. Eventually, a new student-record system will allow the collection of additional data on certificate programs.

***Census date...*** OIR compiles degree and certificate awards from degree census files "frozen" after the reporting period ends on June 30. Federal reporting requirements dictate the timing.

# Faculty and Staff

## *Definitions*

### ***Faculty/staff headcount***

... is the number of employees in the HRMIS personnel-records system as of the census date, excluding hourly and student workers and employees on unpaid leave. In Fall 2000, Research Foundation employees, previously reported separately, were added to HRMIS records. Employees of private contractors, such as bookstore and food services, are not in UML's personnel records

### ***Faculty***

Except where noted, OIR reports include only state-funded, full-time, tenured and tenure-track instructional faculty. Federal and AAUP definitions determine who is counted and how salary is reported. Included are faculty on paid leave and department chairs, all reported at annualized contractual salary. Excluded are faculty on unpaid leave. Deans and other non-instructional employees with faculty status are reported as *staff*.

### ***Staff***

In most OIR reports a staff member is an employee who is not a faculty member. However, federal, state, and UMass system reports define faculty and staff in a variety of ways. For federal reporting, OIR groups employees by the seven EEO (Equal Employment Opportunity) job categories. The monthly UMass Management Report breaks out employees along other lines for payroll purposes, but this breakout is not used in the Factbook. Because of differences in definition, EEO categories cannot be collapsed into Management Report categories.

### ***Student employees***

Teaching Assistants are not included in OIR's employee counts unless specifically identified. Research Assistants and other student workers are not in OIR's database.

### ***State or non-state***

... broadly identifies the employee's funding source. Both have subcategories; for example, state-funded faculty can be AA (full-time) or CC (most part-time). Continuing Education faculty are not state-funded.

### ***Full-time/part-time status***

... is based on specified work periods (staff) or on other conditions of employment (faculty). In OIR reports full-time faculty are tenured or nontenured on tenure-track; part-time faculty include temporary visiting faculty.

### ***Faculty/staff FTE (full-time-equivalency)***

One full-time employee is one FTE, although typically a few full-time benefited staff members are on slightly reduced hours. Part-time staff members are recorded as a fraction of one FTE. Part-time faculty FTE is calculated from credit-hour load: one three-credit course = .25 FTE, so four faculty members, teaching three credit hours each, equal one FTE. Where necessary to meet reporting criteria, OIR modifies HRMIS payroll data. For example, a faculty member on full-year sabbatical leave would be 1.0 payroll FTE at half-salary, 1.0 FTE at full salary for fall AAUP reports, and 0 FTE for annual workload.

### ***Race/ethnicity***

... is recorded under EEO classifications, which are similar to the current federal student classifications for race/ethnicity, but employee records identify non-citizen employees by race/ethnicity rather than as a separate group of Nonresident Aliens. A student employee might therefore have different categories in student and personnel records.

***Census date*** ... OIR compiles faculty and staff data for the fall semester from a HRMIS payroll extract, which OIR modifies for its employee census reporting. Reporting requirements dictate the timing and modifications.

\* All tenured and tenure-track department members, including chairs and others with administrative assignments and faculty on sabbatical leave.

\*\* Includes temporary/visiting faculty. Some part-time faculty teach more than one section, so headcount does not equal the total number of sections taught by part-timers.

\*\*\*Health and Clinical Lab Science changed their dept name to Clinical Lab & Nutritional Services in 2006.

**Note:** Some departments have been reconfigured since 1998, so not all counts are directly comparable from year to year.
