

### Student Summary Data

The Lowell campus has identified various modifications that are desired for Faculty and Student Self Service. Different workgroups on campus have gathered input from a variety of sources, and a team working on the project meets each term with deans and department chairs to address self service concerns. In addition, data gathered from a yearly survey of students and faculty is combined with information from help desks to address system concerns. One of the biggest complaints from staff and faculty is that there are too many pages and too many clicks required to access student records data.

The purpose of the **Student Summary Data** modification is to

- provide direct access to common data
- provide direct links from pages to commonly linked actions, and
- establish security around student data by institution.

The **Student Summary Data** modification will have various tabs to access key components of student records information. The tabs are are described below.

Tab	Description
Personal Data	The student's personal information, including <ul style="list-style-type: none"> <li>• Names</li> <li>• Addresses</li> <li>• Email, and</li> <li>• Emergency Contact Information</li> </ul>
