

## **Setting up Exchange ActiveSync - Motorola Droid**

There have been published reports that Exchange ActiveSync for the Motorola Droid does not work after an upgrade to Exchange 2010 SP1. Motorola is aware of the issue and is recommending users purchase a 3<sup>rd</sup> party application to synchronize email.

The application name is Touchdown from a company called Nitrodesk. For more information and download instructions, please visit <http://www.nitrodesk.com/download.aspx>.

You can use this product free for 30 days. Thereafter, you must purchase a licensed copy for \$19.99.

For Touchdown configuration instructions, please visit <http://email.uml.edu>
