UMass Lowell

Survey of North Carolina Likely Voters

Field Dates: September 18-25, 2020

N=921 North Carolina Likely Voters

Adjusted Margin of Error: +/- 4.1%

Margin of error has been adjusted to include for design effects
resulting from weighting and survey design features

Methodology in Brief

This poll was independently funded by the University of Massachusetts Lowell, designed and analyzed by the Center for Public Opinion. Data was collected by YouGov, an online polling organization. Respondents were selected from YouGov and three other online panels. YouGov interviewed 1057 eligible respondents who were then matched down to a sample of 1000 to produce the final dataset. The respondents were matched to a sampling frame on gender, age, race, and education. The frame of NC Registered Voters was constructed by stratified sampling from the full 2016 Current Population Survey (CPS) Voting and Registration Supplement, with selection within strata by weighted sampling with replacements (using the person weights on the public use file). The matched cases were weighted to the sampling frame using propensity scores. The matched cases and the frame were combined, and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity, years of education, and region. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles. The weights were then post-stratified on 2016 Presidential vote choice, born again status, ideology, and a four-way stratification of gender, age (4-categories), race (4-categories), and education (4-categories), to produce the final weight. Benchmarks for born again and ideology were obtained from the 2014 Pew Religious Life survey. A likely voter screen was then applied to classify 921 likely voters and a likely voter weight was used in the final model disposition.

UMass Lowell is a public institution and releases surveys as a source of public information. We offer a complete methodology report in adherence with standards of the AAPOR Transparency Initiative, as well an extensive set of crosstabs. Our goal is complete transparency in the reporting of our findings. If there is something you do not see here, but wish you did, please contact Director, Dr. Joshua J. Dyck (joshua.dyck@uml.edu; [@drijdyck](#)) or Associate Director, Dr. John Cluverius (john.cluverius@uml.edu; [@JohnCluverius](#)).
