UMass Lowell / YouGov Survey of NH Likely Voters

Survey produced by Dr. John Cluverius, Director of Survey Research

Field Dates: May 6 – May 14, 2024

N=600 New Hampshire Likely Voters
Adjusted Margin of Error: +/- 5.24%

Margins of error have been adjusted to include
design effects resulting from weighting and survey design features

Methodology in Brief

YouGov interviewed 609 New Hampshire residents who were then matched down to a sample of 600 to produce the final dataset. The respondents were matched to a sampling frame on gender, age, race, and education. The sampling frame is a politically representative "modeled frame" of US adults, based upon the American Community Survey (ACS) public use microdata file, public voter file records, the 2020 Current Population Survey (CPS) Voting and Registration supplements, the 2020 National Election Pool (NEP) exit poll, and the 2020 CES surveys, including demographics and 2020 presidential vote. The matched cases were weighted to the sampling frame using propensity scores. The matched cases and the frame were combined and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity, and years of education. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles. The weights were then weighted to give likely voter profiles slightly more weight than their unlikely voter counterparts. Finally, the weights were then post-stratified on 2020 presidential vote choice as well as gender, age (4-categories), race (2-categories), and education (4-categories), to produce the final weight.

36. As you know, New Hampshire law requires its Presidential primary be held first in the nation. Some argue that this is a good idea, New Hampshire voters are highly discerning and independent, and this is part of the tradition of American democracy. Others, however, argue that it's not fair for the same state to vote first in every Presidential election cycle and that this supposed "tradition" only dates back to the 1970s.
