

Total Worker Health® for Occupational Safety and Health Professionals

A free, online, continuing education course that introduces the concept of *Total Worker Health* (TWH) and how it applies to OSH professional practice.

“I’d highly recommend this course to people who are starting their TWH journey and want to learn more.”

**-Deborah Imel Nelson,
PhD, CIH, FAIHA**

About the Program

This free program consists of three self-paced online modules intended for OSH professionals working in a variety of industrial settings. This course content is appropriate for industrial hygienists, environmental safety and health managers, safety specialists, occupational health nurses, and union health and safety stewards. The Course content is designed to build professionals’ TWH competencies in support of the National *Total Worker Health* Agenda 2016-26 (NIOSH, 2016).

Program objectives:

- **Recognize the value of TWH for worker well-being**
- **Explain the defining elements of a TWH program**
- **Identify the relevance of TWH to your professional practice**
- **Develop an interest for an excitement about TWH practice**

Earn CM points or CEUs—This course provides 5 hours of instruction and a **certificate of completion**.

Program Authors

**Jenn Cavallari,
ScD, CIH
Associate Professor
University of CT**

**Suzanne Nobrega, MS
Outreach Director,
CPH-NEW
UMass Lowell**

3 million U.S. workers reported nonfatal workplace injuries and illnesses in 2019 (BLS, 2019) and almost **half of all workers** reported work as always or often being stressful (CDC, 2014).

“Overall, the course was excellent. Professionals interested in learning about TWH and ways to implement a program have the tools they need from this course.”

Laura Weems, CIH, CSP
