Section A: General Statement of Progress

General Statement of Progress

After the CAP was signed by the Chancellor in January 2012, the Climate Action Plan Steering Committee was organized with leaders from Academia and Staff including subcommittees for Admin. and Finance; Energy Projects; Sustainability; Academic; Student Life; Transportation and Public Relations. It is co-chaired by the AVC of Facility Management and Dean of Science. Each subcommittee goal is to develop and initiate action plans to further our purpose to climate neutrality. The CAP Steering Committee is one of foundations of Climate Change; Sustainability and Energy Conservation at the University.

From FY11, when the CAP was developed to FY 13, campus building area has grown by 6.5%; and campus FTE student enrollment has grown by 10.1%. Even with this growth in enrollment and campus buildings, due to our aggressive programs our emissions have reduced by nearly 2%.

Since UML is growing at an unprecedented rate (from 2.6MSF in 2007 to 4.2MSF by 2016) our goals are normalized per SF for Scope 1+2 and per FTE student for Scope 3 since UML has been predominantly a commuter campus.

On a positive note, UML has already exceeded 2020 Interim goal for Scope 3 emissions/FTE. Also UML is nearly halfway to attaining its 2020 goal for Scope (1+2) emissions/KSF.

An aggressive energy project plan has completed projects in the last two years that will reduce GHG by 3700 MTCDe/year. The state's Accelerated Energy Program will design and execute 130 energy conservation measures to reduce GHG by an est. 6000 MTCDe.

The Academic Sub-Committee has increased climate change research and student awareness in UML and is reaching out across the region to high school students with the Climate Change Teach-in and the other programs offered across the university.

The Sustainability Subcommittee has fostered programs using student volunteers for such educational, outreach and awareness programs on Earth Week and other events.

GHG Summaries

Change in GHG gross emissions 2778.7 MTCDe increase

There has been 920 MTCDe reduction in FY13 overall since FY11. Scope1+2 MTCDe decreased by 439; Scope 3 decreased by 481. We have had several GHG mitigation projects including a North Campus Steam Plant renovation and fuel switch from burning #6 FO to Natural Gas; and reducing GHGs by replacing four steam absorbers with Hi-eff. electric chillers on South Campus.

Change in GHG emissions per 1000 sq. ft. building space -4.15621296559

In FY 13, 1.17 MTCDe/1000 SF; a reduction of 7.8% from FY11. Refrigerants emissions increased by 280 MTCDe; proportional to all HVAC construction. Stationary heating plant dropped 576 MT due to fuel switching projects replacing steam absorbers with high eff. electric chillers. Purchased electricity dropped 254 MT from Grid clean-up and fuel switching to cleaner, to efficient gas from
electric heat. We have expanded campus from 2.64 MSF in 2007 to 3.64MSF in 2013 by purchase of Tsongas Arena, Doubletree Hotel; St. Joseph Hospital and converting them to viable space. Also UML built two LEED buildings, Saab ETIC research building and HSSB academic building.

<table>
<thead>
<tr>
<th>Change in GHG emissions per full time enrollment (FTE)</th>
<th>-2.08518687121</th>
</tr>
</thead>
<tbody>
<tr>
<td>Change in GHG emissions per FTE</td>
<td>0.19 MTCDe/FTE; reduction of 11.4%Enrollment is up 4654 from 2007 (over 60%). In 2013, enrollment is 12,377. In 2007 there were 7723 FTE students. FTE Student commuting increased GHG emissions by 790 MT. Air travel reduced by 1226; reduced paper and T&amp;D loss (176 MT reduction).</td>
</tr>
</tbody>
</table>

### Section C: Education Research and Community Engagement

**Education**

**How is your institution making climate neutrality and sustainability a part of the curriculum and other educational experiences for all students?**

Through the Climate Change Initiative faculty are working on a proposal for a Climate Change and Sustainability Minor. A minor called Environment and Society already exists which focuses on the connection between environmental and social issues. Furthermore, the Francis School of Engineering also offers multiple degree programs and sustainability related courses. Students are also allowed and sometimes encouraged to address issues related to a sustainable society for Capstone projects. In other departments students can choose to perform Capstone projects or Directed Studies related to sustainability and climate neutrality. Furthermore, the University has made a large push to further service learning opportunities and many of those have had a direct correlation to climate and our sustainability in the real world. (More details below)

**Has your institution utilized any of the following education methods?**

- **No** Included sustainability learning outcomes, tracks, or certificates in every academic major.
- **No** Included sustainability in fulfilling regional accreditation requirements.
- **No** Included sustainability in fulfilling state accreditation requirements.
- **No** Included sustainability learning outcomes into institutional General Education Requirements.
- **Yes** Offered professional development to all faculty in sustainability education.
- **No** Other:
  
  A Sustainability Workshop is being offered to faculty who would like to learn how to introduce Sustainability and Climate Change into courses from all...
colleges.

No  None of the above

<table>

</tr>
<tr>
<td>We are redeveloping our website into one central page. However we currently have the Climate Change Initiative's website (<a href="http://www.uml.edu/Research/Climate-Change/default.aspx">http://www.uml.edu/Research/Climate-Change/default.aspx</a>) and the Environmental and Emergency Management Department's Recycling and Sustainability page (<a href="http://www.uml.edu/EEM/Recycling/default.aspx">http://www.uml.edu/EEM/Recycling/default.aspx</a>)</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Does your institution include sustainability prominently in new student orientation?</th>
<th>Yes</th>
</tr>
</thead>
<tbody>
<tr>
<td>If available, please add the website URL where information about sustainability in new student orientation is available</td>
<td></td>
</tr>
</tbody>
</table>
The Environmental and Emergency Management Department is present at the Dean's Welcome on Freshmen Move-In Day and they are also present at Freshman Convocation activities. Furthermore, all dorms feature recycling bins in centralized and convenient locations.

During Freshman Orientation sessions Difference Makers Program is present they encourage students to address problems through innovative solutions, sustainability, environmental, and climate related problems could be issues students address.

No central website currently exists however we are currently working on getting one up and running.

### Research

<table>
<thead>
<tr>
<th>If applicable, how is your institution expanding research efforts toward the achievement of climate neutrality research?</th>
<th>A research center at the University, the Climate Change Initiative (CCI), is well-established and firmly works towards increasing the presence of Climate Change research within the institution. The CCI Steering committee, a group of 7 key faculty, also serves as the Academic branch of the Climate Action Plan Steering Committee. Of the 19 other members consisting of faculty and staff, numerous are involved in climate-related research. In January 2014 the Center is holding a workshop to promote and assist in implementing interdisciplinary climate change education and research University-wide.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Does your institution have a program to encourage student climate and or sustainability research?</td>
<td>Yes</td>
</tr>
<tr>
<td>If yes, please provide a brief description of the institution's program(s) to encourage student research in sustainability</td>
<td>Students are selected by faculty to study and perform research leading to graduate degrees. It is more of an informal program for qualified students with interest.</td>
</tr>
<tr>
<td>Does your institution have a program to encourage faculty climate and or sustainability research?</td>
<td>Yes</td>
</tr>
<tr>
<td>If yes, please provide a brief description of the institution's program(s) to encourage faculty research in sustainability</td>
<td>Climate Change Initiative (<a href="http://www.uml.edu/Research/Climate-Change/default.aspx">http://www.uml.edu/Research/Climate-Change/default.aspx</a>) largely serves as the University’s main driver for sustainability and climate research</td>
</tr>
<tr>
<td>But: Center for Sustainable Energy (<a href="http://www.uml.edu/centers/CSE/default.html">http://www.uml.edu/centers/CSE/default.html</a>)</td>
<td></td>
</tr>
</tbody>
</table>
Community Engagement

How is your institution expanding community outreach efforts toward the achievement of climate neutrality?

The CCI serves as the University’s primary outreach mechanism with respect to climate neutrality. The CCI has fostered over 50 community and industry partnerships for various efforts related to climate neutrality. A few highlights include the Clean Energy Council, Climate Interactive and the MIT Systems Dynamics Group of the MIT Sloan School, partnerships with various regional high schools (including Lowell, Gloucester, Cambridge Rindge and Latin School, Stoughton, among others). Lastly, the CCI has partnered with many local, area and state green teams, environmental and activist groups. In addition, the Student Environmental Alliance (SEA) a club related to the CCI has made some additional connections with the community.

(More details below)

<table>
<thead>
<tr>
<th>Does your institution participate in community climate change and or sustainability partnerships?</th>
<th>Yes</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Partner with the city of Lowell for sustainability and recycling</td>
<td></td>
</tr>
<tr>
<td>• Partnered with Casella our waste hauler on recycling and waste initiatives</td>
<td></td>
</tr>

### Other GHG mitigation efforts

- Other Misc. efforts:
  - Recycled furniture and cooking oil; CCI; incentive fund, green tips;
  - Transportation initiatives; Tree Campus USA; Green Guard Certification; DOT ECO Award; LBE Award
  - pretax transit passes; RideShare; Student Orientation; Alt. transportation; Shuttle; Freewheelers; carpooling; Access to Bike Repair; AEP; EnerNOC EEMS; CES Utility Tracker; Composting food waste in Dining Hall ([http://www.uml.edu/News/stories/2013/CompostingProgram.aspx](http://www.uml.edu/News/stories/2013/CompostingProgram.aspx));
  - Photos for composting here ([http://web.uml.edu/gallery/index.php/student_events/Food-Composting-at-University-Dining-Commons](http://web.uml.edu/gallery/index.php/student_events/Food-Composting-at-University-Dining-Commons));
  - Zero Sort Recycling; Electric Car Fleet; CBECS Benchmarking; SEA growth; Earth Week activities; GIS IR Thermographic flyover.

## Financial Data

### Savings...

<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Has your Climate Action Plan and/or related sustainability efforts saved your institution money so far, e.g. by reducing operational expenses?</td>
<td>Yes</td>
</tr>
<tr>
<td>Estimate the total monetary amount spent on Climate Action Plan projects and/or related sustainability efforts at the time of this Progress Report</td>
<td>Dropdown List $1-10 M</td>
</tr>
<tr>
<td>Approx. $4.8 Million.</td>
<td></td>
</tr>
<tr>
<td>Estimated money saved to date from implementing your CAP</td>
<td>Dropdown List $1-10 M</td>
</tr>
</tbody>
</table>
## Estimated total savings expected from implementing entire Climate Action Plan

Cost avoidance developed by calculation for EE projects that have been executed plus average of rebates over the last two years amount to Annualized savings of about $1.0 Million. In addition to another $780K from Transportation Dept. for annual debt service and maintenance for structure parking. Brings our total annual savings for CAP Implementation to approximately $1.78 Million.

## Funding...

- **Financial resources (dollar amount) secured from outside sources to support mitigation efforts related to the Climate Action Plan (grants, gifts, etc...)**
  - $3,500,000

  Out of the $3.5M: See in box below for detailed breakdown.

  In addition we are including The future AEP, Accelerated Energy Program, which is a program to be funded by the state bond for an estimated $25,000,000 performance contract. It will cover over 130 energy projects campus-wide and is scheduled to be completed in 2015.

## Financing Methods...

**Financing Methods utilized for Mitigation or Renewable Energy Projects**

Please check all that apply:

- Borrowed against endowment
- Efficiency Services Agreement (ESA) **✓**
- Managed Utility Service Contract (MUSC)
- Power Purchase Agreement (PPA) **✓**
- Renegotiating Purchased Utilities Agreements
- Revolving Loan Funds
- Tax Exempt Lease Purchase Agreements (TELP)

<tr>
<td></td>
<td>Other On-Campus Stationary</td>
<td>14,416.5</td>
<td>14,992.7</td>
<td>(576.18) -3.8%</td>
<td>North campus heating plant upgrades; energy efficiency improvements &amp; Green Building standards</td>
</tr>
<tr>
<td></td>
<td>Direct Transportation</td>
<td>985.0</td>
<td>875.4</td>
<td>109.69 12.5%</td>
<td>Increased gasoline usage in fleet vehicles</td>
</tr>
<tr>
<td></td>
<td>Refrigerants &amp; Chemicals</td>
<td>969.7</td>
<td>869.6</td>
<td>280.10 40.6%</td>
<td>FY13 and FY11 refrigerant emission estimates revised November 2013; implemented screening method for both years (mass balance previously used for FY13) based on more accurate inventory of equipment on site. Note: emissions based % of full charge lost during normal operation per screening method. Note that GWP of 134a changed from 1300 to 1430 per CACP reference source.</td>
</tr>
<tr>
<td></td>
<td>Agriculture</td>
<td>8.4</td>
<td>6.6</td>
<td>1.72 25.9%</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Purchased Electricity</td>
<td>15,113.1</td>
<td>15,367.5</td>
<td>(254.36) -1.7%</td>
<td>Overall decrease in emissions; electricity consumption up 11.38% but the eGRID factor decreased by 10.58%</td>
</tr>
<tr>
<td></td>
<td>Faculty / Staff Commuting</td>
<td>2,231.9</td>
<td>2,105.4</td>
<td>126.30 6.0%</td>
<td>Overall increase in emissions; auto miles up 13.7%; avg. one way distance up slightly; fuel economy also up 9% (lower emissions per mile)</td>
</tr>
<tr>
<td></td>
<td>Student Commuting</td>
<td>12,555.1</td>
<td>11,765.3</td>
<td>789.75 6.7%</td>
<td>Overall increase in emissions; auto miles up 8.8%; one way distance down slightly; number of students up 4.7%; fuel economy also up 9% (lower emissions per mile)</td>
</tr>
<tr>
<td></td>
<td>Directly Financed Air Travel</td>
<td>1,649.4</td>
<td>2,640.7</td>
<td>(991.24) -37.5%</td>
<td>8.8% decrease in passenger miles; 48% decrease in kg CO2 per passenger mile (airlines consuming less fuel per passenger mile)</td>
</tr>
<tr>
<td></td>
<td>Study Abroad Air Travel</td>
<td>644.0</td>
<td>879.1</td>
<td>(235.10) -26.7%</td>
<td>FY13 emissions revised November 2013 to account for group travel based on &quot;passenger miles&quot; (not trip miles); overall decrease in emissions; 7.4% increase in passenger miles; 48% decrease in kg CO2 per passenger mile (airlines consuming less fuel per passenger mile)</td>
</tr>
<tr>
<td></td>
<td>Solid Waste</td>
<td>(37.2)</td>
<td>(42.8)</td>
<td>5.60 -13.1%</td>
<td>Total tons of solid waste down 12%; emissions revised December 2013 to reflect &quot;mass burn&quot; incinerator (previously tracked as &quot;refuse derived fuel&quot;) &amp; current CACP emission factor of -40 kg/short ton for FY11 &amp; FY13 per CACP v. 6.9. The emission factor is negative (i.e. GHG &quot;saving&quot;) because the waste would otherwise break down over time and release methane, which is a stronger greenhouse gas than CO2 from incinerator. Instead, the waste is used instead of fossil fuels to generate heat or electricity. Therefore, this results in few emissions than would have been emitted by standard utility generation.</td>
</tr>
<tr>
<td></td>
<td>Paper</td>
<td>186.6</td>
<td>337.4</td>
<td>(150.80) -44.7%</td>
<td>45% reduction in paper purchases likely due largely to new printing policy implemented in 2012 (double sided printing and student charged for paper); FY11 recycled content also changed from 30% to 0% as the majority of paper purchased in both FY13 and FY11 is 0% recycled.</td>
</tr>
<tr>
<td></td>
<td>Scope 2 T&amp;D Losses</td>
<td>1,494.7</td>
<td>1,519.9</td>
<td>(25.16) -1.7%</td>
<td>Overall decrease which accounts for increased consumption in kWh and decrease in eGRID emission factor</td>
</tr>

<td>(0.46)</td>
<td>-11.4%</td>
</tr>
</tbody>
</table>

*Note: The FY11 emissions uploaded to the ACUPCC site = 56,686 MTCO2e. This figure was revised to reflect more accurate commuting data, actual FY11 No. 6 oil burned (8,896 gallons), revised refrigerant emissions based on more accurate inventory of refrigeration equipment (screening method), 0% recycled content paper (rather than 30%), and 0 emissions for landfilled solid waste (for consistency with FY13 CACP emission factors attributing solid waste emissions to landfills only (not incinerators/waste to energy plants).}
