

Attendance App Student Quick Guide

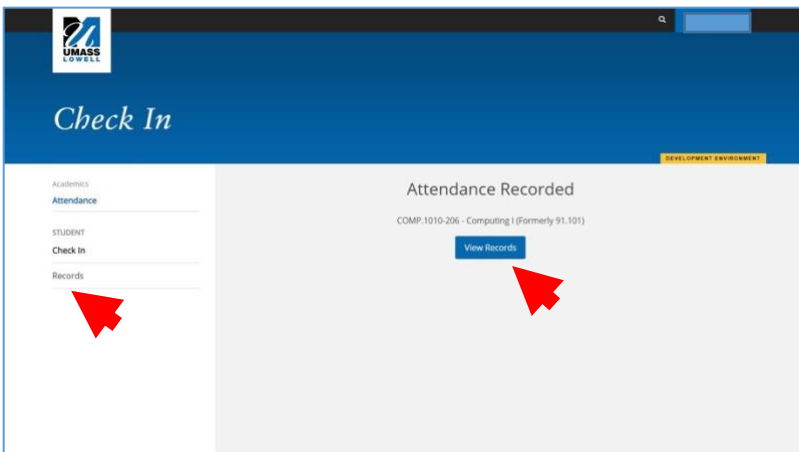

To access the attendance app go to www.uml.edu/attendance with any device and log in with your student email credentials.

When you log in you will be prompted to enter the four-digit code for your class. Your instructor will provide a new code each class. To mark yourself as present for your class enter the code in the field and click the “Check In” button.

Please note: Sharing codes with remote students is considered academic misconduct subject to disciplinary action for both parties. Attendance data can be used to compute participation points, in accordance with the course syllabus. Often class engagement and participation can be used as an indicator for student success.

This will give you a confirmation page to let you know your attendance has been recorded and which class it has been recorded for. To view your attendance records, select “Records” from the menu on the left or use the “View Records” button in the center after you check in.

Viewing Attendance Records

When you view your records you will be shown a list of your classes. Select the calendar button for the class you would like to see your attendance records for.
