

INTRODUCING THE Healthy Workplace Participatory Program

*Free and available online: a toolkit for achieving
Total Worker Health™ in your organization!*

Program Benefits:

Boosts Employee Engagement
in Health/Safety Initiatives

Provides Integrated Solutions for Improved
Health, Safety, & Well-being

Supports Continuous
Organizational Improvement

Improved Employee Satisfaction &
Organizational Health Climate

Why is this program different?

- 1. Integrated solutions** – Program addresses problems/issues systematically across a health and safety spectrum.
- 2. Enhanced communication, teamwork & stress control** – Program tools promote collaborative decision-making about health and safety across all levels of the organization.
- 3. More effective programs and policies** – Employees engaged in designing a healthier workplace often know how to target activities that matter and can make a difference.
- 4. Creates a business case for each intervention** – The IDEAS intervention planning tool requires careful definition of health and business metrics.
- 5. Better program participation** – Research shows that using these toolkit materials enhances employee participation, the key to building a successful and sustainable TWH program.
