INTRODUCTION

The Department of Clinical Laboratory and Nutritional Sciences and the Department of Public Health offers a Master's Degree in Public Health with 2 nutrition options: a) a Coordinated Program in Dietetics option, which is an accredited Coordinated Program in Dietetics (Dietetics option); b) a Nutrition option, which in not intended to prepare students to become RD’s and is not accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). This handbook provides information about the policies and procedures for the Coordinated Program in Dietetics, but is not the only resource available to students. Please work closely with your academic advisor and seek out information from the many resources offered by UMass Lowell.

Accreditation Statement for the Dietetics Option

The UMass Lowell MPH Coordinated Program in Dietetics has been granted Candidacy Status for Accreditation by The Accreditation Council for Education in Nutrition and Dietetics (ACEND).

Accreditation includes self-analysis, preparation of a self-study report, and an on-site evaluation visit by a team of professional peers. Dietetics educators and practitioners, appointed by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) board, participate in the peer review process to determine if a program is achieving its own educational objectives and meeting the accreditation standards. The ACEND board accredits programs that are able to meet these standards.

Candidacy status is awarded after review of an eligibility application and self-study report and an on-site evaluation indicate that the program is progressing toward compliance with the Accreditation Standards and demonstrates institutional readiness to implement the proposed program. After candidacy for accreditation is granted, the program may enroll students. Students on premises and enrolled after candidacy is granted will be considered graduates of an accredited program on successful completion of the program.

PLANNING GUIDE FOR STUDENT SUCCESS

Plan your courses carefully
- Use the course of study document to help plan your courses
- Meet with your advisor every semester during the advising period. This is required and necessary to lift your advising hold to allow you to register for classes.
- Be aware that all many courses required for the MPH are offered only one semester a year and most are not offered during summer school.
- Many courses have pre-requisites so plan to take courses on the suggested timeline.
- Practice good time management. Expect to spend 3 hours studying each week for every credit you are taking.

Assume responsibility for your own continued personal and professional growth.
- Start by making academic, professional, and personal goals for yourself.
- Start a portfolio that includes examples of your academic work, achievements, and pre-professional experiences during supervised practice.
- Join local and national professional organizations including but not limited to the student arms of the Massachusetts Dietetic Association and the Academy of Nutrition and Dietetics.

To Become A Registered Dietitian (RD)
You must complete the didactic and supervised practice requirements at an accredited program, pass the National Registration exam, and complete the required Continuing Education Units. Successful completion of the Coordinated Program at UMass Lowell fulfills the didactic and supervised practice requirements.
PROGRAM DESCRIPTION

The Department of Clinical Laboratory and Nutritional Sciences and the Department of Public Health are both part of The College of Health Sciences. The Coordinated Program in Dietetics requires all students complete a basic core of courses, which provides advanced study in nutrition and public health. Advanced courses in the curriculum are based on the Knowledge Requirements and Learning Outcomes defined for an entry-level dietitian by Accreditation Council for Education in Nutrition and Dietetics.

Courses

All Dietetics students are required to complete public health core courses, public health nutrition core courses, and a 2 semester Practicum. The nutrition core courses are an in depth study of human nutrition and the nutrition problems in national and international communities and how nutrition related public health interventions are used to prevent and address these problems. The public health core courses are required and include in depth study of biostatistics, epidemiology, environmental health, health policy and management, and health behavior.

The students in the Dietetics option will be required to take Programs and Policies in Public Health Nutrition, Food and Nutrition Management, and Advanced Clinical Nutrition. These are specifically designed to prepare students with the knowledge and skills necessary for supervised practice and taking the RD exam with the ultimate goal of preparing students to practice as entry level RD’s.

Supervised Practice

All students in the Dietetics option must complete 1200 hours of supervised practice. The first semester includes 60 hours of supervised practice in Programs and Policies in Public Health Nutrition. The second semester includes 60 hours of supervised practice in Food and Nutrition Management. The first summer session will include an additional 300 hours of supervised practice.
The start of the second year will include 120 hours as part of the MPH Capstone and another 60 hours of supervised practice in Advanced Clinical Nutrition. The last regular semester will include another 120 hours in the second part of the MPH Capstone and 240 hours supervised practice in clinical nutrition, including 80 hours of staff relief, and 240 hours in food service management.

**Time required**

The Dietetics option can only be taken full time, and students can only begin study in the Fall semester. Typically it takes 24 months to complete the Dietetics program, and this includes one summer session. The main difference between the 2 nutrition options is that the Dietetics option is accredited for both the coursework and 1200 hours supervised practice required to take the RD exam. As a result, it requires longer to complete, there are more pre-requisites, an additional application packet, and there are additional fees associated with this program.

*Students enrolled in the Dietetics option are required to complete a mandatory, non credit orientation in the Fall prior to their first year of study. The orientation will be approximately 3 days, and will start 1-2 weeks before regular courses begin.*

**PROGRAM DESCRIPTION**

The mission of the MPH Coordinated Program in Dietetics (Dietetics option) is to “to promote public health nutrition by preparing graduates to practice entry level dietetics with knowledge, competence and the ability to address the needs of diverse communities.”

This mission statement is in accordance with the mission statement for UMass Lowell which states: “The Mission of the University of Massachusetts Lowell is to provide an affordable and accessible education of high quality and to conduct programs of research and public service that advance knowledge and improve the lives of the people of the Commonwealth, the nation, and the world.”

**Program goals and outcome measures for the Dietetics Option are as follows:**

**Goal #1:** To prepare graduates for a successful entry-level position as a Registered Dietitian

Expected outcomes and target measures:

1a) Over a 5 year period, 80% of Dietetics graduates will pass the Registration Examination for Dietitians, administered by the Commission on Dietetic Registration, the first time they take the exam.

1b) At least 80% of students admitted to the Dietetics program will complete the program within 3 years from beginning the program (150% time).

1c) Over a 5 year period, at least 70% of graduates who seek employment in dietetics related positions will find employment within 8 months of completing the program.

**Goal #2:** To prepare graduates to be life-long learners who seek opportunities for personal and professional growth.

Expected outcomes and target measures:

2a) Over a 5 year period, 75% of UMass Lowell Dietetics graduates who respond to an alumni survey will report being a member of a local or national professional group.

2b) Over a 5 year period, 90% of UMass Lowell Dietetics graduates who respond to an alumni survey will indicate that they have participated in post-graduation training related to their profession.
2c) Over a 5 year period, 40% of graduates who respond to an alumni survey will indicate that they are preceptors.

Goal #3: To prepare graduates who are competent to address the health and nutrition needs of diverse populations.
Expected outcomes and target measures:

3a) Over a 5 year period, at least 40% of graduates who respond to an alumni survey, and sought employment in dietetics, will be working with diverse populations.

3b) Over a 5 year period, at least 80% of employers who respond to an employer survey will rate graduates as acceptable or higher in their ability to work with diverse populations.

3c) Over a 5 year period, 80% of graduates who respond to an alumni survey will indicate that they were well prepared to address the health and nutrition needs of diverse populations.

Program outcome data is available upon request, please contact the Program Director:

ADMISSION AND APPLICATION PROCESS FOR THE MPH COORDINATED PROGRAM IN DIETETICS OPTION

Students wishing to become Registered Dietitians (RDs) should apply to the MPH Coordinated Program in Dietetics option, which will be referred to as the Dietetics option. The students following the Dietetics option receive a Verification Statement upon graduation, which is needed to take the RD exam. The Dietetics option requires unique standards and admissions policies as outlined below.

Applying to the Dietetics option.

- The completed application deadline is January 1" for admission into the subsequent (fall) matriculating class. All documents that are part of the application are due at this time (e.g. letters of recommendation, official transcripts, statement of purpose, GRE scores, etc.). Applications deemed incomplete at the application deadline of January 1 will be ineligible for a full review.

- All application documents should be submitted directly to the Office of Graduate Admissions. To apply to graduate programs at UMass Lowell you may apply online at the UMass Lowell Graduate Admissions Office- [http://www.uml.edu/grad/](http://www.uml.edu/grad/) or mail a hard copy to:
  
  Office of Graduate Admissions
  Cumnock Hall, Suite 110
  One University Avenue
  Lowell, MA 01854-5130

- The Program Director and the Dietetics option admissions committee review all completed applications combined with interviews to finalize admissions decisions. Students will be notified of the outcome no later than April 5th".

"The deadline for the Application packet required for admission and the notification of acceptance into the program will go into effect in January 1 of 2017. The first admissions cycle will begin shortly after candidacy for accreditation has been granted, which is planned for Summer of 2016 with enrollment of the first class to being Fall 2016.
Application to the Dietetics option

- Admission into the Dietetics option is competitive.
- Due to programmatic constraints, meeting all admission criteria does not guarantee placement into this option.
- Students who wish to pursue the Dietetics option should meet the following minimum criteria to be considered for admission:
  - Baccalaureate degree from a 4 year college or University or international equivalent, with an overall GPA of at least 3.0.
  - Graduate Record Examination (GRE) within past 5 years. The GRE requirement may be waived with a prior graduate degree. Individuals who graduated from UMass Lowell in the past 5 years with a GPA of 3.5 or higher may be able to waive the GRE upon approval of the Program Director. The GRE requirement may also be waived for Medical or Dental Aptitude scores.
  - Three letters of recommendation, one (1), of which must be submitted by a Registered Dietitian.
  - A minimum of 35 hours of documented personal experience (volunteer or paid) in a nutrition, dietetics, or health setting.
  - A personal statement describing why the student wishes to enter the Dietetics option and what their future career goals are (800-1200 typed words).
  - Computer literacy in word, excel, powerpoint, etc., is expected.
  - Students applying for the Dietetics option must earn grades of B- or better in the following college level pre requisite courses before beginning graduate level courses and supervised practice: Human Nutrition, Microbiology, Food Science with Lab, Medical Nutrition Therapy I and II, Life Cycle Nutrition, Nutrition and Metabolism, Biochemistry, Organic Chemistry, Statistics, Biology or Anatomy and Physiology, and Psychology or Sociology or Anthropology.
  - Students may be asked to provide documentation of equivalent course content being proposed to meet admission criteria.
  - No more than two (2) pre-requisite courses may be missing at the time of application. Courses which are "in-Progress" at the time of the application deadline are considered missing.
  - All prerequisite courses must be completed before orientation in late August.
  - Admitted students who fail to complete all prerequisites will NOT be allowed to enter the program. There will be no exceptions to this rule. Prerequisite courses can not be completed once you have begun the program. Additionally, it will be assumed that you have already mastered the material in the prerequisite courses. If it is not feasible for you to complete all prerequisites by the end of August, then you should wait and apply during the next admissions cycle.

Application to the Dietetics option for International applicants

- International applicants must submit English competency test score TOEFL or IELTS.
- Official transcripts must be evaluated by the Center for Educational Documentation: www.cedevaluations.com
- The faculty supports the position to recruit and retain students who by reasons of ethnic, cultural, or socioeconomic background are more likely to serve areas of critical need.
Assessment of Prior Learning

- There are NO exemptions for supervised practice hours or courses which include supervised practice, such as the MPH Practicum.
- No assessment for prior learning will be considered for core nutrition/dietetics graduate courses in the Dietetics option degree pathway. Core nutrition/dietetics courses include: Public Health Nutrition, Programs and Principles in Public Health Nutrition, Food and Nutrition Management, Nutrition Assessment, Nutrition Epidemiology, and Advanced Clinical Nutrition.
- Students may be asked to provide documentation of equivalent course content proposed to meet admission criteria for the prerequisite courses.

Requirements for Completion of Program

Each student admitted to the Dietetics program shall, upon satisfactory completion of all program requirements, be verified to be eligible for active membership in the Academy of Nutrition and Dietetics and to write the Registration Examination offered by the Commission on Dietetic Registration. Program completion requirements include maintaining a semester and cumulative grade-point average of at least 3.0, earning a B or higher in professional courses and rotations, earning scores of 2 (satisfactory) or above on performance evaluations for all supervised practice rotations that directly relate to competencies, and earning grades of B or better on assignments that directly relate to a competency. If the circumstances of failure to achieve competency warrant such action, at the discretion of the program faculty and preceptors, the student may be allowed to repeat courses, projects, assignments, or rotations one time only to achieve the required competence. If these criteria are not met on the second attempt, the student will not be allowed to continue in the Dietetics option.

Evaluations

Students are evaluated frequently throughout the program to provide opportunities for growth and development. Students are evaluated upon completion of each rotation by their preceptors, and faculty will also observe students during supervised practice during field visits. Major projects and assignments during rotations will require additional evaluations, and the criteria to demonstrate that the competence has been met will be clearly articulated in the syllabus. Students are responsible for distributing evaluation forms to their preceptors. Evaluation forms are kept confidential and kept on file. Students may request access to these upon completion of the program.

Students will also be asked to evaluate their supervised practice sites and preceptors. They will also complete course evaluations and for some courses peer evaluations and self evaluations.

Graduate student progress is monitored in many ways including monitoring of grades and performance evaluations by instructors, preceptors, and peers. There are additional policies in place to guide student progression.

Criteria to remain in the Dietetics option:

- Overall cumulative GPA must be a 3.0 or greater
- Semester GPA must be a 3.0 or greater
- Grades of “B” or better or scores of “2/Satisfactory” or better on all assignments and performance evaluations that directly relate to a competency.
- No overall grade lower than B in professional courses* or Rotations.
- No substitutions/transfer of professional courses* or rotations.
- No withdrawals from professional courses or rotations.
For students who do not meet the criteria:
Students in the Dietetics option must meet the GPA standards and must get a B or higher in professional courses and rotations, and earn a B or “Satisfactory” or better on all assignments that relate directly to a competency. Students who do not meet these criteria can repeat the course, assignment, project, or rotation 1 time to try and improve their grade. Students may be asked to secure their own supervised practice if they are repeating a rotation. If they do not meet the standards a second time, they will be dropped from the Dietetics option.

**Behavior Policy and Affective Domain Objectives**

The University of Massachusetts Lowell prides itself on its preparation of young men and women for their chosen careers. There is an expectation of the maintenance of high standards in the daily interactions between students and faculty and vice versa. The Faculty and Staff in the College of Health Sciences expect polite, professional, respectful adult behavior from ALL students at ALL times in the classroom, during supervised practice, and elsewhere. The behavioral requirements listed below are to be followed at ALL times. Any violation(s) of any of these requirements can result in the instructor/staff/observer filing a Critical Behavior Incident Report form that will be forwarded to the Division of Public Health for review and recommendations of disciplinary action that may include but are not limited to: 1.) a lowering of the student’s grade in a course, 2.) a failing grade in the course, 3.) referral to the University Campus Conduct Process, 4.) dismissal from the course, the academic program, the Departments, and/or the University.

The handbook that describes the University of Massachusetts Lowell Student Conduct Code and Discipline Process is available online at:

Students are advised to be familiar with its contents. The Conduct Code applies to ALL aspects of University life including interactions with faculty/staff, fellow students, or outside visitors in and outside of the classroom.

**Affective Domain Objectives**

After reading the Behavior Policy and the University of Massachusetts Lowell Student Conduct Code and Discipline Process, the student will:

1. **Communication Skills**
   Communicate respectfully with all faculty, staff and students in or outside the classroom through expression, tone, body language, personal space and choice of words.

2. **Use of Constructive Criticism and Instruction**
   Accept constructive criticism politely and receptively, and respond to recommendations to improve professional potential and/or course performance.

3. **Professional Conduct**
   a. Demonstrate a professional, cordial, cooperative attitude at ALL times both in and out of the classroom.
   b. Respect cultural and personal differences.
   c. Interact in a professional manner at ALL times with all faculty, staff, and students in and out of the classroom.
   d. Represent the School and the University effectively.

4. **Personal Responsibility**
   a. Carefully follow written and verbal instructions.
   b. Complete assignments and commitments.
   c. Be punctual.
d. Assume responsibility for all actions and their consequences.

e. Recognize limitations.

5. Laboratory Classes
   a. Follow ALL safety regulations, including appropriate personal protective equipment.
   b. Maintain a clean, safe, and organized work area.
   c. Arrive prepared for the day’s laboratory exercises.
   d. Follow all instructions, guidelines, and procedures, written and verbal.

6. Academic Honesty
   Follow all University, Department, and individual course policies regarding honesty, cheating and plagiarism.

7. Disruptive Activities
   Refrain from disruptive activities as defined by the UML Student Conduct Code and Discipline Process: “Interference with freedom of speech or movement, or intentional disruption or obstruction of teaching, research, administration, activities, or other functions or the incitement of others to do any of the above on or off campus.”

College of Health Sciences Social Media Policy
The College of Health Sciences recognizes that all involved in health care have a moral, ethical and legal responsibility to maintain individual’s rights to privacy. HIPAA protects patient privacy by law and includes any individually identifiable patient information in oral or recorded form where the information could identify an individual by name, medical condition, demographic data or other means. Students in the College of Health Sciences are expected to act with honesty, integrity and respect the privacy rights of others. All students in the College of Health Sciences are expected to meet their professional responsibilities when using social media and other electronic networks including but not limited to blogs, instant messaging, social networking sites, email, public media sites and photographs. This policy prohibits posting written material or photographs that identify patients, health care agencies, educational institutions or other students in clinical sites or patient related activities. This policy applies whether using University devices and computers or personal equipment. In addition, all College of Health Sciences students are required to abide by clinical agency policies related to the use of social media and technological resources.

Failure to adhere to this policy may result in probation, suspension or dismissal from the College of Health Sciences and/or legal prosecution under the requirements of HIPAA.

GENERAL POLICIES:
1. Students must follow the published curriculum in their respective degrees to successfully complete the program. For course descriptions go to the University Graduate Online Catalogue at http://www.uml.edu/Catalog/Graduate/default.aspx

2. A dress code is required during their off-campus rotations.

3. Students may be assigned to off-campus internships by the Program Director based on availability.

4. Depending on assigned rotation, the student may be required to attend an orientation outside of the regularly scheduled internship.

5. Students are advised that a CORI (Criminal Offender Record Information) check is mandated by most agencies prior to practicum experiences. Failure to pass a CORI check may jeopardize continued matriculation and clinical placements. In addition, some clinical sites may require drug testing. Failure to pass a drug test may jeopardize continued matriculation and clinical placements.

University Appeals Process Regarding Academic (Non-Grade Appeal and Non-Misconduct) Issues

Policies and Procedures for Supervised Practice

- The majority of supervised practice will take place off campus. Students assume full responsibility for their own transportation, including the cost of travel and safety of travel. Students are also responsible for any injury or illness that occurs during supervised practice.

- Criminal background checks, drug screening, and immunization verification may take place prior to any supervised practice. This will be determined by the facility where supervised practice takes place and UMass Lowell policy.

- Students must arrange their schedules to be available for supervised practice. Hours are delineated by the individual course and instructor, and/or practice facility and preceptors. Supervised practice assignments during the second year may be scheduled as early as 4:00 a.m. and as late as 9:00 p.m., Monday through Friday and occasionally on weekends.
Because of the demanding schedule of supervised practice, outside employment is strongly discouraged, especially during the second year of study. Supervised practice hours cannot be arranged to accommodate employment hours.

Programs and rotations are not required to pay interns when on rotations and while participating in learning activities. However, interns are not to be used to replace employees. In general, interns should not be brought into a workplace if the sole intention is to provide free labor when paid employees are absent.

Insurance for students
All students are required to have health insurance and must provide evidence of insurance coverage. Costs for health services not covered by insurance are the responsibility of the student.

Malpractice insurance is provided for all students involved in supervised practice for the amount of $2,000,000 per occurrence and $4,000,000 in the aggregate. The Division of Public Health presently covers the cost of this insurance.

Student Expenses
Estimated expenses for a graduate student for a typical 24 month program based on tuition for 2016-2017. Please note, tuition costs outlined in the table do NOT include any pre-requisite courses.

Registered dietitians (RDs) are food and nutrition experts who have met the following educational and professional criteria to earn and maintain the RD credential:

1. **Academic and supervised practice**—Complete coursework required for a Master’s degree and a minimum of 1200 hours of supervised practice at a U.S. regionally accredited university or college approved by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). This is referred to as a Coordinated Program in Dietetics (Dietetics). The Dietetics is a composite of courses and supervised practice selected to meet the Learning Outcomes for entry-level dietitians, which can be found at [www.eatright.org](http://www.eatright.org). Students are awarded a Verification Statement after they have successfully completed the Dietetics program. Students will need a Verification Statement in order to take the Registration Exam.

2. **Registration Examination**—Pass a national examination administered by the Commission on Dietetic Registration (CDR). Application to take the examination is made to the Commission of Dietetic Registration following verification of completion of the academic and experience (supervised practice program) requirements.

3. **Continuing Education**—Complete 75 clock hours of continuing professional education (CPE) every 5 years to maintain registration status as a Registered Dietitian. Continuing professional education is essential for lifelong development to maintain and improve knowledge and skills.

**Assessment of Student Learning**

In order to prepare students for careers in dietetics, students are required to learn and apply the Foundation Knowledge and Competencies during their graduate education in an accredited Dietetics program. The Domains are outlined below.

1: **Scientific and Evidence Base of Practice**: integration of scientific information and research into practice

2: **Professional Practice Expectations**: beliefs, values, attitudes and behaviors for the professional dietitian level of practice.

3: **Clinical and Customer Services**: development and delivery of information, products and services to individuals, groups and populations

4: **Practice Management and Use of Resources**: strategic application of principles of management and systems in the provision of services to individuals and organizations

5: **Support Knowledge**: knowledge underlying the requirements specified above.

Students are assessed in a variety of ways. Below is a table of key assessment methods and the courses they take place in.

<table>

<td>Nutrition Assessment</td>
<td>KRD 2.1, CRD 2.5, CRD 3.1a</td>
</tr>
<tr>
<td>Case Studies</td>
<td>Advanced Clinical Nutrition, Programs and</td>
<td>KRD 2.1, KRD 3.1, KRD 3.2, KRD 5.2</td>
</tr>
</tbody>
</table>
Dietetics students should also become familiar with the Code of Ethics to the Profession of Dietetics which is available at:

http://www.eatrightpro.org/resources/career/code-of-ethics/what-is-the-code-of-ethics

All members of the Academy of Nutrition and Dietetics and Registered Dietitians are bound to abide by this code of ethics. Students should expect to follow the Code during their educational and supervised practice experiences. Additionally, this will be reviewed during courses and there will be at least 1 quiz to assess understanding of the Code of Ethics.
STUDENT RESOURCES

Academic calendar:
http://www.uml.edu/Registrar/Calendars/

Tuition and fee information:
http://www.uml.edu/admin/ar/ tuition.html
Other expenses associated with the Dietetics program include transportation to field work sites or volunteer experiences, extra supplies or materials for class projects, and student membership to the Academy of Nutrition and Dietetics, and a clinical training fee.

Financial aid information:

Graduation Requirements:
To qualify for University degrees, MPH candidates are required to present a minimum of 42 semester credits; to fulfill the minimum residency requirement; to satisfy the regulations and academic standards of the colleges that exercise jurisdiction over the degree for which they are matriculating; and to complete all curriculum requirements specified by the college in which they are enrolled and department(s) in which they are majoring.
Graduate students are required to file a Graduation Clearance form prior to graduation.
The form can be found at: http://www.uml.edu/docs/clearance_form_tcm18-3565_tcm18-117528.pdf

Verification statements:
Students who successfully complete the Coordinated Program including all coursework and supervised practice will be awarded a Verification Statement after graduating from the program. One copy will be retained in each student’s file. Verification statements are kept indefinitely. The Program Director submits documents to the Commission on Dietetic Registration of the Academy of Nutrition and Dietetics verifying the names of students who have been issued a verification statement and are eligible to take the exam. CDR sends candidates packets of information that includes the application to take the registration exam for dietitians and a handbook that explains the application procedure. A fee must be submitted for the application.

ADVISING
The Centers for Learning Advising Center provides students with the information and advice they need to make informed decisions about their academic career. Staff members provide SiS support to students and faculty, and advise students on majors, careers, study skills and fulfilling University academic requirements, including general education requirements.

http://www.uml.edu/class/
South Campus: O'Leary Library, 1st Floor
North Campus: 308 Southwick Hall
978-934-2936

Academic Advising:
Students in the Division of Public Health are assigned an academic advisor.

ORGANIZATIONS AND ACTIVITIES:

Academy of Food and Nutrition Student Member (www.eatright.org) – There are many benefits to being a student member including access to scholarships, mentoring, job postings, and nutrition information resources. DPD students are required to become members ($50 fee). Application forms and membership information are available online http://www.eatright.org/students/join/.

Massachusetts Dietetic Association (MDA) (http://www.eatrightma.org/) The Massachusetts Student Dietetic Association (MSDA) is an organization for students from all realms of nutrition - from undergraduates, to graduates, to dietetic interns - that works to promote student visibility, support networking engagements, and provide professional opportunities to up-and-coming nutrition professionals.

The Nutrition Club at UMass Lowell is offered under the Office of Student Activities & Leadership. This is an official Club within UMass Lowell that any student interested in food and nutrition can join. There are leadership opportunities and plenty of room for socialization with others that have a common interest.
JOB OPPORTUNITIES

GRIEVANCES AND COMPLAINTS

The University has a number of student appeals policies and procedures described in the student graduate catalogue. The policies outlined in the online graduate catalogue can be found at:
https://www.uml.edu/Catalog/Graduate/Policies/General-Policies.aspx

Information about academic appeals can be found at:

Information about appealing grade(s) in graduate courses can be found at:
https://www.uml.edu/Catalog/Graduate/Policies/Graduate-Grade-Appeal-Process.aspx

Information about appealing student integrity or misconduct issues can be found at:
https://www.uml.edu/Catalog/Graduate/Policies/Academic-Integrity.aspx
As outlined in the appeals policies included above, if an informal discussion between the student and the program director, instructor, or other individual with whom the student has a conflict does not resolve the issue, the resolution of a grievance should begin within the department. The first step in the resolution of a problem or disagreement should be a discussion between the instructor, the student, and his/her faculty advisor or the coordinator of the program (the graduate coordinator for the MPH is Leland Ackerson, whose contact information is included here: https://www.uml.edu/Health-Sciences/Public-Health/CHS/faculty/ackerson-eland.aspx. If the matter cannot be resolved after such a discussion, a formal appeal, in writing and containing the pertinent facts, should be presented by the student to the head of the Department/Department Chair. The head of the Department/Department Chair for the Department of Clinical Laboratory and Nutritional Sciences is Garry Handelman (contact information for Dr. Handelman is included here: https://www.uml.edu/umass-BMEBT/faculty/handelman-garry.aspx. The Department Chair will review the complaint and follow Department and University policy in handling any arbitration, including moderating a meeting between the student and the Program Director, Instructor, or other party involved. Students who file complaints can be assured that the student’s rights will be protected against retaliation.

The Accreditation Council for Education in Nutrition and Dietetics (ACEND) (http://www.eatrightacend.org/ACEND/content.aspx?id=6442485390) will review complaints that relate to a program’s compliance with the accreditation/approval standards. The Commission is interested in the sustained quality and continued improvement of dietetics education and programs but does not intervene on behalf of individuals or act as a court of appeal for individuals in matters of admission, appointment, promotion or dismissal of faculty, staff, or students. Complaints should not be submitted directly to ACEND unless all other options with the program and University have been exhausted.

A copy of the accreditation/approval standards and/or the Commission's policy and procedure for submission of complaints may be obtained by contacting the Education staff at ACEND, 120 South Riverside Plaza, Suite 2000, Chicago, IL 60606 or by calling 800/877-1600, ext. 4872.
