This one-week experiential learning in Israel is part of a 2-week intensive (Jan 2 – 18) Winter course “Managing Sustainability in a Global Environment”. The course will include cases, videos, site visits and lectures/workshops to highlight sustainability initiatives, both local and global so students can appreciate the innovative approaches to find “sustainable solutions to the major challenges in today’s world” (Pillar III of UML 2020 Strategic Plan).

Israel – a land where ancient history and modern technology intersect; a start-up nation, a sustainability innovation hub; diverse cultures, archaeology, varied topography.

OPEN TO HONORS STUDENTS (ALL MAJORS) & BUSINESS (GRADUATE & UNDERGRADUATE) STUDENTS
