Chancellor Moloney invites you to a

KICK OFF

Feb. 2, 2017
3-6 P.M. Alumni Hall, North Campus

- Welcome by Chancellor Moloney
- WAVES Project Overview
- Keynote Address: Dr. Pamela Conrad, Goddard Space Flight Center, NASA
- Poster Session and Reception

Making WAVES (Women Academics Valued and Engaged in STEM) is a 5-year NSF funded initiative to promote the success of women faculty in STEM fields. The NSF ADVANCE program is designed to identify and eliminate organizational barriers that impede the full participation and advancement of women faculty.

Keynote Address:
Wanted: 21st Century Explorers!
Women and Men Working Together in STEM

Keynote Speaker:
Dr. Pan Conrad—Deputy PI and Investigation Scientist for Sample Analysis at Mars on the Mars Science Laboratory mission. She is also a co-investigator to both the SHERLOC chemical sensor and the MEDA environmental sensing package. Dr. Conrad has a wealth of experience to share related to being a woman who has successfully navigated a male-dominated field.
