UMass Lowell / YouGov Survey of New Hampshire Likely Republican Primary Voters

Survey produced by Dr. John Cluverius, Director of Survey Research

Field Dates: December 7, 2023 – December 18, 2023

N=450 New Hampshire Likely Republican Primary Voters
Adjusted Margin of Error: +/- 5.4%

Margins of error have been adjusted to include
design effects resulting from weighting and survey design features

Methodology in Brief

YouGov interviewed 498 respondents who were then matched down to a sample of 450 to produce the final dataset. The respondents were matched to a sampling frame on gender, age, race, and education. The sampling frame of Republican primary voters is based upon the pooled 2020 and 2022 CES and the voterfile. The matched cases were weighted to give likely voter profiles slightly more weight than their unlikely voter counterparts. The sample was then weighted to the demographic frame of Republican primary voters using IPF (Iterative Proportional Fitting), commonly known as raking. The sample was raked on gender by age (4-category), 2-category race, 4-category education, and 2-category party ID (Republican + leaners, and Independents) The weights were trimmed at 4 and then re-centered to have a mean of 1, to produce the final weight.

UMass Lowell is a public institution and releases surveys as a source of public information. We offer a complete methodology report in adherence with standards of the AAPOR Transparency Initiative, as well an extensive set of crosstabs. Our goal is complete transparency in the reporting of our findings. If there is something you do not see here, but wish you did, please contact Director of Survey Research, Dr. John Cluverius (john_cluverius@uml.edu; [@JohnCluverius](#)).
