The NEW Version no longer has a “There is pending request to the server” pop-up confirmation when there is a pending dashboard request. Though the request has been made, there is no notification.

FAQs

Q: What user name and password do I use to log into Summit 12C?
A: Users will continue to use their email address and password to log into Summit.

Q: Will my existing bookmarks work?
A: No, they will not. You should go to the Summit logon button either on the Empac or HRDirect page and if book mark that site, not the logon url.

www.uml.edu/empac or www.uml.edu/HRDirect

Q: Why do I see the Home Page instead of my preferred dashboard?
A: Reset a preferred default by clicking on “My Account” under your name in the upper right hand corner and choosing your starting page.
Q: Do I need to set my preferred time zone?
A: No, time zones will automatically set. Adjusting them will cause issues with date times in reports.

Q: What if I see issues with the information on a dashboard?
A: Through February 15th we will be in a heightened issue review period. Issues should be sent to Norma_Clark@Uml.edu. After February 15th use the IT TechServices through HELP@uml.edu.

Q: What if I identify content missing from 11G?
A: Through February 15th we will be in a heightened issue review period. Issues should be sent to Norma_Clark@Uml.edu. After February 15th use the IT TechServices through HELP@uml.edu.

**Known Issues**

- There is 1 known issue to report in the Finance area. This issue has been escalated to Oracle. When navigating to a hidden dashboard page the other pages in the dashboard are now visible where they were hidden in 11. Users need to continue to use the bread crumbs to navigate back to the previous page rather than clicking on the tab as the tabs hold prompts that may not exist on the Summary page therefore changing the results.

11G/OLD
No tabs are presented

![Sponsored Activity](image1)

12C/NEW
Visible tabs before navigation

![FDM: PI](image2)

Visible tabs after navigation
The above message has been added to the pages to indicate that users need to use the bread crumbs to navigate back to the previous page.
