Converting Existing PowerPoint Slides to TurningPoint Slides

1. Start TurningPoint and select ‘Content’ on the TurningPoint Dashboard.

2. Within the ‘Content’ drop-down menu, select ‘Import’.
3. Select the PowerPoint presentation that you want to Convert to a TurningPoint Presentation.

4. In the left-hand queue, highlight the PowerPoint Presentation and click ‘Edit Presentation’ button on the lower right side. (TurningPoint will open your PowerPoint presentation automatically).
5. Highlight the PowerPoint slides you wish to convert to TurningPoint slides.

6. In the TurningPoint toolbar, click ‘Objects’ from the drop-down menu, then ‘Charts’, and then select the type of Chart you wish to use. (In this case, the “Vertical” chart is selected.)
7. After the slides have been converted, they appear as typical TurningPoint slides. Notice that the slide Preferences box will now appear on the right-hand side and some formatting changes may need to be made. Also, you can now manipulate the slides as poll questions.

8. You may want to change bullet formatting, text size, and location of certain graphics.
