# Installing SolidWorks

Go to https://www.uml.edu/IT/Services/Software/solidworks.aspx and review the information provided. **This page contains links to the necessary SEK-ID Number and the Solidworks License Key.**

Click the button on the page to "Request access to SolidWorks".

You will be taken to a page with a form to complete. Include the **SEK-ID** provided at the above website.

After clicking "Request Download", on the following page click "Accept Agreement & Continue"
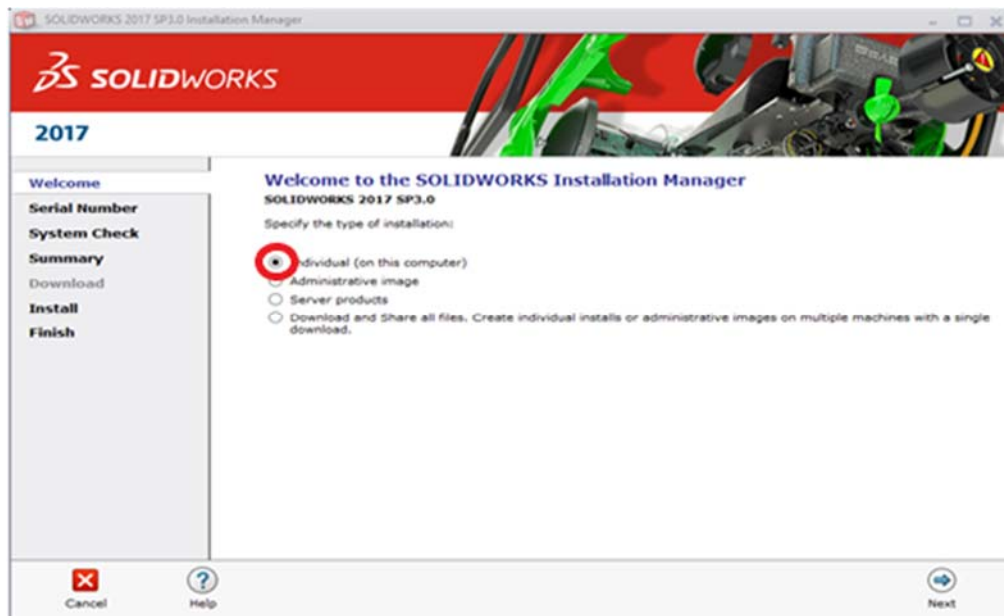

On the next page click "Download" and the download will start.

The first step to installing SolidWorks is to run the Setup.exe file inside of the file downloaded from SolidWorks website.

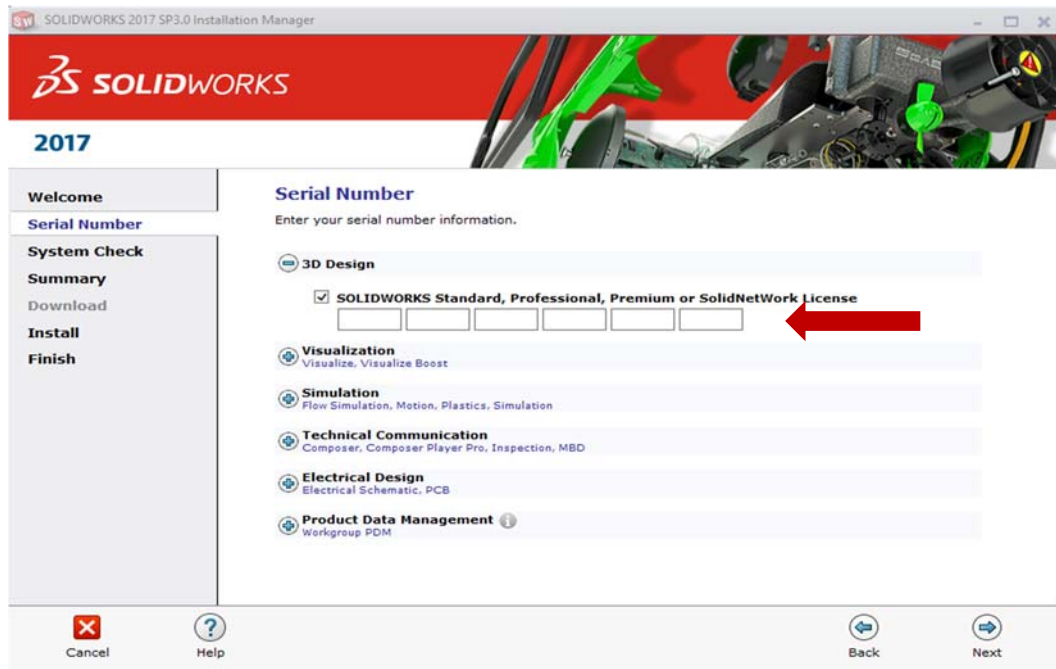

Make sure you select 'Yes' on the permissions prompt that comes up, or enter your administrative credentials.
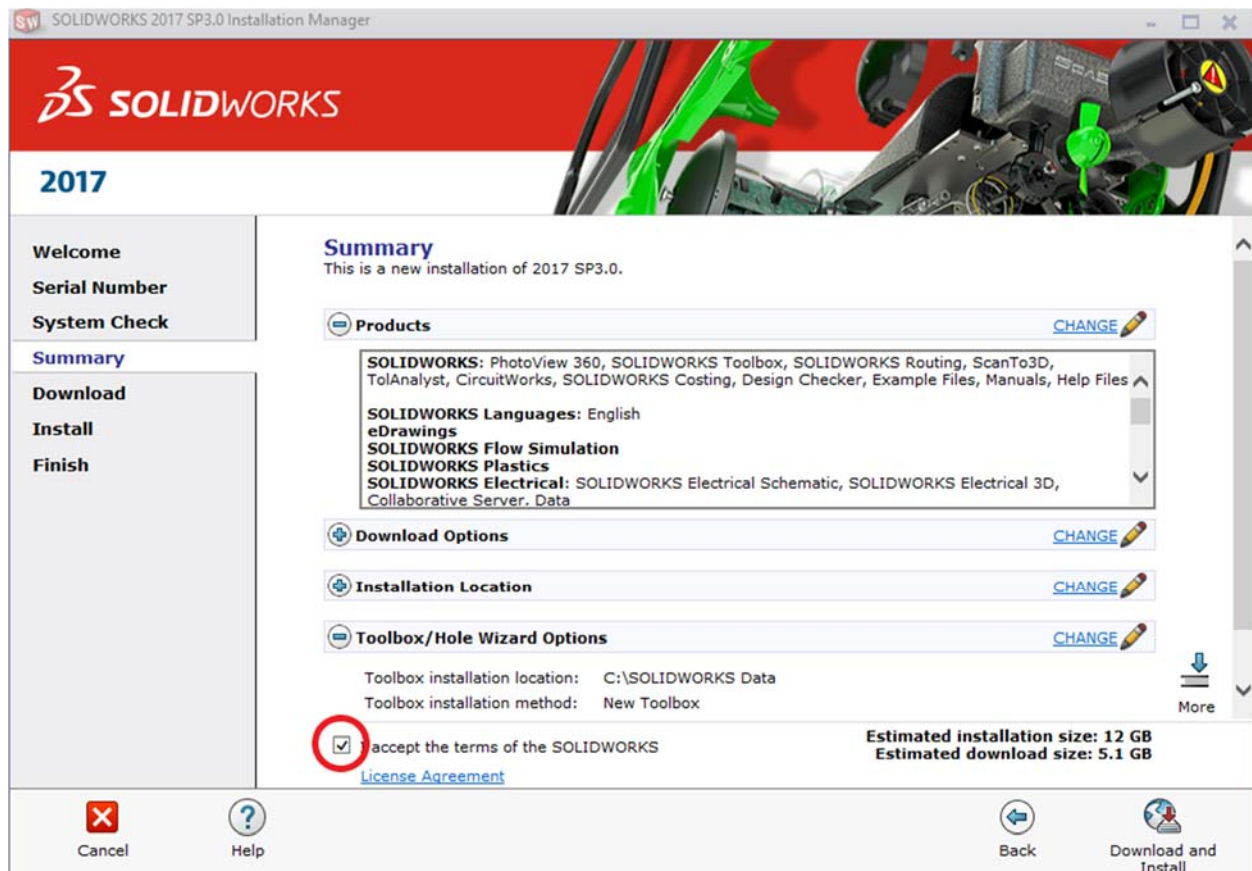

Next make sure the circle for "Individual (on this computer)" is selected then press 'Next'.
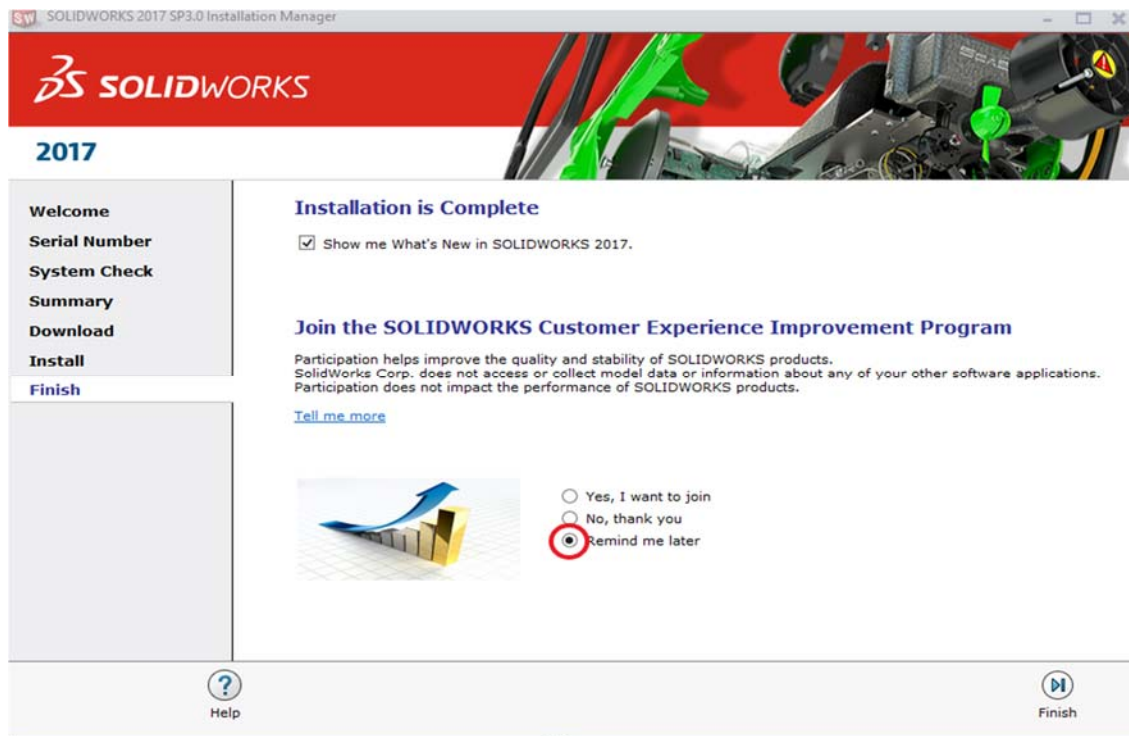

On the next page, enter the serial number under the tab 3D Design then click "Next". Make sure the check box for "SOLIDWORKS Standard, Professional, Premium or SolidNetWork license" is selected.

Next check the box to accept the SolidWorks terms then click "Download and Install".

Next you select the circle that says remind me later and then click "Finish".

The last step is to select "Restart Now" and that will restart your computer and finish the install. If you need to save work, you may select 'Restart Later' and restart your computer at another time, however the SolidWorks program will not work properly until you restart your PC.
