ENERGY INNOVATION FORUM

COMPANY ORIGINS

- Commercial electricity customers want renewable energy that will save them money

Schools

Businesses

Farms

Municipalities

Grid Power
Not renewable

Grid Renewables
Too expensive

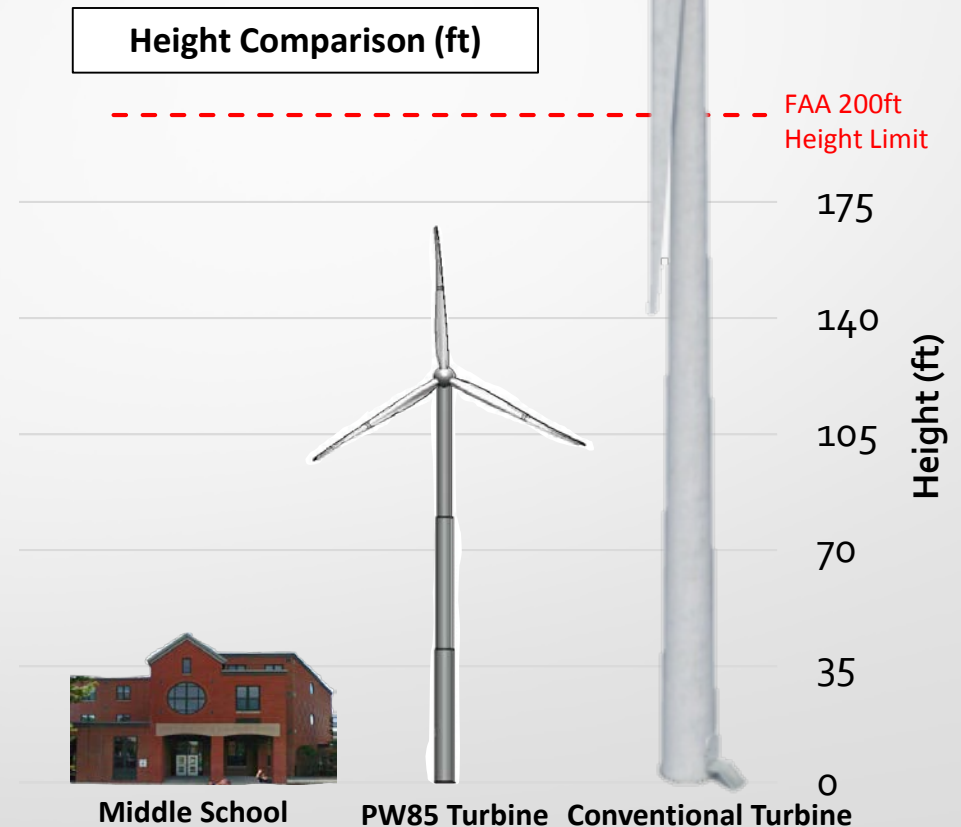

Distributed Solar
Requires new roof, lots of space, and good solar resource

ENERGY INNOVATION FORUM

KEY PRODUCTS/TECHNOLOGIES

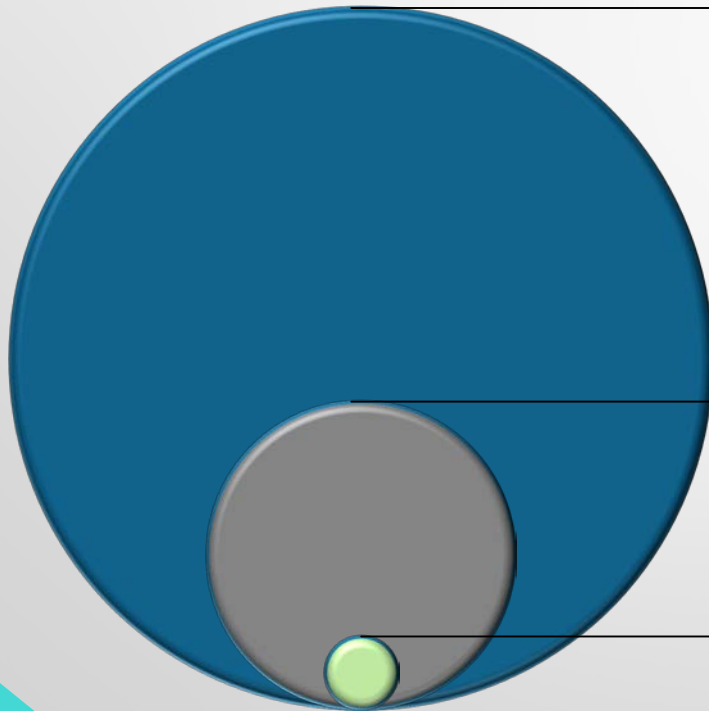

- Wind power for commercial electricity customers
- Wind power that costs less than grid
- Wind power as a service

ENERGY INNOVATION FORUM

COMMERCIAL IMPACT

- **8.7% of US electric demand can be met by distributed wind turbines** (NREL, 2016)

Total Available Market: \$3.8B / year

-Global market for distributed wind turbines

Serviceable Available Market: \$744M / year

-Global market for commercially sized distributed wind turbines

Beachhead Market: \$70M / year

-Rural schools and universities in the USA

ENERGY INNOVATION FORUM

TEAM

Josh Groleau

-Co-Founder, CEO
-7 years in wind turbine mechanical design at Siemens Wind Power and Ogin Energy

Cameron Reagor, PhD

-Co-Founder, VP Business Development
-10+ years in wind power R&D at Boulder Wind Power and Ogin Energy

Jim Forte

-VP Engineering
-10 years in engineering including wind turbine design at Vestas and Ogin Energy

Chris Culver, MBA

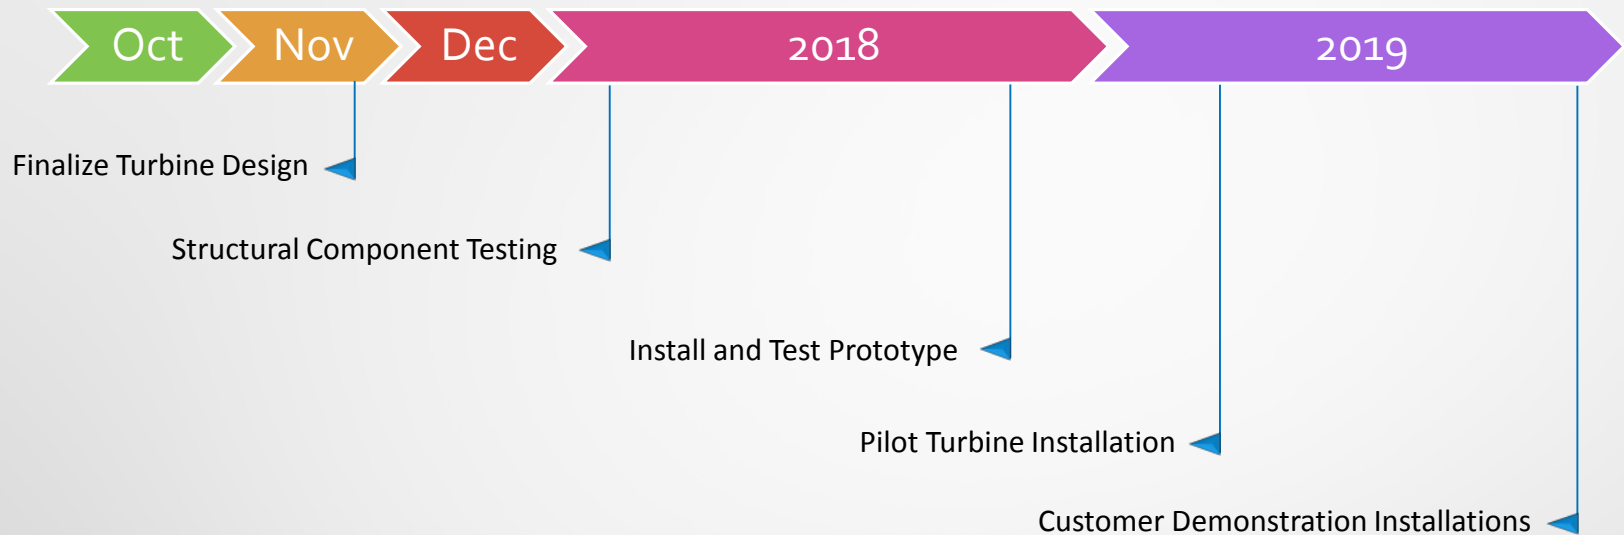

-CFO (acting)
-Background in business consulting and 4 years in generator engineering

Technical Advisor:

Richard McMillan – Tower Design Advisor, 15+ years managing wind turbine tower manufacturing facilities.

ENERGY INNOVATION FORUM

NEXT STEPS AND NEEDS

-We are currently raising pre-seed round of \$500,000 to fund structural testing.

-We are always looking to meet prospective customers.
