Post-Doctoral Fellow- Nursing & Public Health Research

Academic Background Required: - PhD or equivalent research degree in nursing, public health or related field.

Position Description: The School of Health and Environment (SHE) at the University of Massachusetts Lowell was created to promote human health and development that enables people to live in safe and productive communities and environmentally sustainable economies. The SHE prepares professionals ready for employment in a wide range of health and environmental occupations including nursing. A large research program and vibrant community engagement enrich and support the educational programs. The Nursing Department, located within SHE, is a leader in its responsiveness and creativity in shaping nursing education and research to meet the needs of the health care community of today.

The goals of this postdoctoral fellowship are consistent with the strategic goals of the Nursing Department and funded grants to promote and improve the health of underserved populations and educate a diverse nursing workforce to aid public health efforts to decrease health disparities. The postdoctoral fellow is provided opportunities to participate in ongoing research projects related to health disparities in maternal health using a large linked database and advanced practice nursing policy, as well as develop new connected research, present at research conferences, submit manuscripts and prepare grant applications. The primary faculty mentor, Dr. Angela Nannini, will supervise the fellow and facilitate options to enhance research skills through enrolling or auditing courses, joining public health research networks, interacting with other SHE researchers, and participating in seminars and professional meetings. Depending on the fellow's career goals, academic teaching opportunities are also available. The initial term of this fellowship is one year with an option to renew contingent upon funding.

Other Considerations:
- Quantitative analysis skills
- Excellent written and spoken English communications skills
- A demonstrated record of strong skills in data management and analysis using standard statistical analysis software
- A demonstrated record of experience analyzing large data sets
- A demonstrated record of individual initiated in research

Required Applicant Documents:
- Cover Letter
- Curriculum Vitae
- Writing Sample- Research Publications
- Research Statement
- Names and contact information of three references

Initial review of applications will begin immediately, and will continue until the position is filled. However the position may close when an adequate number of qualified applications are received.
