

Accessing vLabs using iOS

1. Enter the Apple App Store and search for “VMware Horizon View Client.” Figure 1 shows the results of the search, and the application page in the Apple App Store.

Figure 1

2. Click the “Free” then “Install” button to begin the installation process. Enter your Apple App Store credentials if prompted and install the application.
3. The application will download and install itself, please wait for this process to finish.
4. Once the installation process is complete, open your applications menu and find the VMware Horizon View Client.
5. Open the application by clicking on the icon below.

- Once opened you will see the “Add Server” button shown in figure 2.

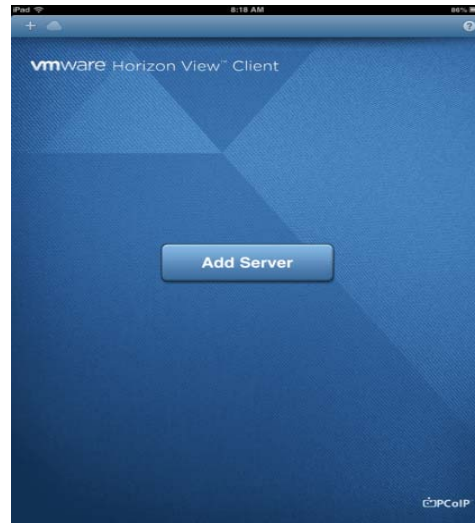

Figure 2

- You are then prompted for a Server Name, enter “vlabs.uml.edu” then click the connect button. Figure 3 shows the entered information.

Figure 3

Figure 4

8. After clicking connect, you are prompted for a username and password. Please enter your student email address and password into the correct fields shown in figure 4 above. You can safely ignore the “Domain” field.
9. Click the connect button to log into vlabs.uml.edu.
10. Once logged in, there will be a list of all virtual labs that you have been provisioned access to. Select the virtual lab desired to log in. Figure 5 shows the list of virtual labs available.
